Alok Kumar Singh

Senior Android Developer

aloksingh191196@gmail.com | +91 7007405580 | linkedin.com/in/aloks19 | Portfolio
Bengaluru, India — relocating to Germany

PROFESSIONAL SUMMARY

Senior Android Developer with 6+ years' experience building high-performance fintech applications serving 1M+ users. Expert in Kotlin, Jetpack Compose and Kotlin Multiplatform (KMP), with a strong focus on clean architecture, TDD and CI/CD automation. Improved app crash-free rate from 95% to 99.33% on a live trading platform, led end-to-end product delivery, and mentored engineering teams. Currently at Verifone, building a unified, configurable app that consolidates ~10 regional business apps into one. Google Certified Associate Android Developer.

KEY SKILLS

- **Languages:** Kotlin, Java
- **Android:** Android SDK, Jetpack Compose, Kotlin Multiplatform (KMP/KMM), Material Design, Coroutines, Kotlin Flow
- **Architecture:** MVVM, Clean Architecture, modularisation, design patterns
- **Libraries & Tools:** Hilt, Ktor, Firebase (Crashlytics, Analytics, FCM), Gradle, Git, Jenkins
- **Testing:** JUnit, Espresso, Mockito, Test-Driven Development (TDD)
- **AI-Assisted Engineering:** Claude Code, GitHub Copilot — reusable AI workflows adopted across the team

PROFESSIONAL EXPERIENCE

Senior Software Engineer (Android) — Verifone (payments technology), Bengaluru — Sep 2026 – Present

- Building a single, configurable Android app for Verifone's Asia region that replaces ~10 separate business-specific apps with one shared codebase
- Designing a configuration-driven, modular architecture so each business can enable its own features, flows and branding without a separate app
- Cutting duplicated code, maintenance effort and release overhead by consolidating multiple product lines onto one platform

Senior Android Developer — Punch (fintech, trading platform), Bengaluru — Apr 2023 – Apr 2026

- Developed a high-performance trading app and real-time financial charting module, optimised for speed, reliability and live market data updates serving 1M+ users
- Led end-to-end delivery of the trading application using Jetpack Compose, Hilt, MVVM and Kotlin — from architecture design through Play Store release
- Improved crash-free rate from 95% to 99.33% by diagnosing root causes and shipping targeted stability fixes across the 1M+ user platform
- Architected migration of a legacy Android application to Kotlin Multiplatform, enabling shared business logic across Android and iOS
- Early adopter of AI-assisted development (Claude Code, GitHub Copilot), achieving 3–5x productivity gains; built reusable AI workflows scaled across the team
- Mentored 4–5 junior developers on architecture, code quality and testing; reviewed 10–15 PRs weekly

Android Developer — Punch, Bengaluru — Jun 2020 – Mar 2023

- Improved push notification deliverability from 90% to 99.99% by optimising the notification pipeline for reliable, timely delivery
- Designed and shipped a referral programme feature driving user acquisition and retention across the trading platform

- Automated CI/CD pipelines using Jenkins, reducing deployment effort by 70% and accelerating release cycles

Android Developer — Cashify, Gurugram Feb 2020 – May 2020

- Built the user profile module (personal information, addresses, profile photos)
- Developed device diagnostics detecting and reporting Bluetooth, Wi-Fi and SIM status
- Improved app stability through systematic debugging and deployment optimisation

Android Developer Trainee — MountBlue Technologies, Bengaluru Nov 2019 – Jan 2020

- Intensive Android bootcamp (Java, Android framework); built a CricBuzz clone and Movies DB app using Retrofit, MVVM, Dagger, Room and Paging

EDUCATION

B.Tech — Pranveer Singh Institute of Technology
2014 – 2018

CERTIFICATIONS

- Google Associate Android Developer
- HackerRank Problem Solving
