Alok Kumar Singh

SENIOR ANDROID ENGINEER

Senior Android Engineer with 6+ years of experience building high-performance fintech and payments applications serving 1M+ users. Expert in Kotlin, Jetpack Compose, and Kotlin Multiplatform Mobile (KMM) with a strong focus on clean architecture, TDD, and CI/CD automation. Proven track record of improving app crash-free rates from 95% to 99.33%, leading end-to-end product delivery, and mentoring engineering teams. Currently at Verifone, building a unified, configurable app that consolidates ~10 regional business apps into one. Leverages AI-assisted tools (Claude Code, Codex) for accelerated development workflows.

Google Certified Associate Android Developer

SKILLS

- Languages: Kotlin, Java
- Android: Android SDK, Jetpack Compose, Kotlin Multiplatform Mobile (KMM), Material Design, Kotlin Coroutines, Kotlin Flow
- Architecture: MVVM, Clean Architecture, Modularisation, Design Patterns
- Libraries & Tools: Hilt, Ktor, Firebase (Crashlytics, Analytics, FCM), Gradle, Git
- Testing: JUnit, Espresso, Mockito, Test-Driven Development (TDD)
- AI & Productivity: Claude Code, GitHub Copilot, Codex, AI-Assisted Planning, Custom AI Workflows

EXPERIENCE

Senior Software Engineer (Android)

Verifone *Sep 2026 - Present*

- Building a single, configurable Android app for Verifone's Asia region that replaces ~10 separate business-specific apps with one shared codebase
- Designing a configuration-driven, modular architecture so each business can enable its own features, flows and branding without a separate app
- Cutting duplicated code, maintenance effort and release overhead by consolidating multiple product lines onto one platform

Senior Android Developer

Punch *Apr 2023 - Apr 2026*

- Developed a high-performance single-screen trading app and real-time financial charting module, optimizing for speed, reliability, and real-time market data updates serving 1M+ users
- Led end-to-end development of the trading application using Jetpack Compose, Hilt, MVVM, and Kotlin — from initial architecture design through Play Store release
- Improved app crash-free rate from 95% to 99.33% by diagnosing root causes and implementing targeted stability fixes across the 1M+ user trading platform
- Architected and migrated a legacy Android application to Kotlin Multiplatform Mobile (KMM), enabling shared business logic across Android and iOS
- Adopted Claude Code and GitHub Copilot early, achieving 3-5x productivity gains — built reusable AI workflows and prompt patterns scaled across the team
- Mentored 4-5 junior developers on architecture patterns, code quality, and testing best practices
- Reviewed 10-15 PRs weekly focusing on code quality, performance, and edge cases

Android Developer

Punch *Jun 2020 - Mar 2023*

- Improved notification deliverability from 90% to 99.99% in the Analysis app by optimizing the push notification system for reliable and timely delivery
- Designed and shipped a referral program feature to drive user acquisition and increase retention across the trading platform
- Automated CI/CD pipelines using Jenkins, reducing deployment effort by 70% and accelerating release cycles

Android Developer

Cashify *Feb 2020 - May 2020*

- Built a user Profile module enabling viewing and editing of personal information, addresses, and profile photos
- Developed device diagnostics functionality to detect and report Bluetooth, Wi-Fi, and SIM card status
- Improved app stability through systematic debugging and deployment optimization

Android Developer Trainee

MountBlue Technologies *Nov 2019 - Jan 2020*

- Completed an intensive Android development bootcamp focused on Java and the Android framework
- Built a CricBuzz clone and Movies DB application using Retrofit, MVVM, Dagger, Room, and Paging Library
